

# What is ColorQuartz?

Quartz is one of the hardest minerals, even harder than steel! When quartz is added to a swimming pool plaster, replacing crushed marble, that surface becomes more durable.

## Key features of the ColorQuartz

- High quality quartz & high quality inorganic pigments
- The same coating process has been used for over 75 years
- Extremely durable material that will not fade or bleed. We warrant that the ColorQuartz will not fade for 10 years!
- Withstands harshest environments
- Consistent color – batch to batch, time after time

## ColorQuartz vs. Standard Plaster

### ColorQuartz Crystals

- Strengthens the plaster mix
- Intensifies color
- Camouflages stains
- More abrasion-resistant
- Can be acid-treated multiple times
- 10 year warranty

**vs.**

### Plain Plaster

- Wears more easily
- Less color
- Shows stains, mottling
- Limited acid treatments

**For the quality-conscious builder, its no contest!**

# ColorQuartz vs. Pebble Pools

## Colorquartz Crystals

- ColorQuartz Crystals are smooth
- ColorQuartz has
- Builder and plaster have more freedom to creative blends that work well for their customers
- 10 year warranty

**vs.**

## Pebble Pools

- Can be harsh on feet
- Expensive

# ColorQuartz vs. Preblend Pool

## ColorQuartz Crystals

- ColorQuartz Crystals provide brilliant color for pools
- Builder and plaster have more freedom to creative blends that work well for their customers
- 10 year warranty

**vs.**

## Preblended Finishes

- Limiting brand names
- Bags containing cement can have shorter shelf-life
